## Treat the Cause...Not Just the Symptoms

Are allergies keeping you from fully enjoying life? An **allergy** is a disorder of the immune system which occur to environmental substances known as allergens. An allergic reaction can come from just about anything: food, drinks, drugs, herbs, vitamins, clothing, jewelry, chemicals, paint, silicone, latex, pollen, grasses, etc.

### Imagine being rid of your allergies! That's right.

Through the innovative process of **Nambudripad's Allergy Elimination Techniques (NAET)**, allergies can be treated in a natural, painless and non-invasive way. This method is safe for newborn infants, the elderly, coma patients and pets.

NAET can be used to treat unrecognized and asymptomatic allergies that could cause illness in the future. And, NAET can complement other medical therapies requiring the use of pharmaceutical drugs, such as antibiotics, chemotherapy, and radiation.

### A Revolutionary Solution

NAET uses a blend of selective energy balancing, testing and treatment procedures from acupuncture/acupressure, allopathy, chiropractic, nutritional, and kinesiological disciplines of medicine. **One allergen is treated at a time.**

### Learn Self-Treatment Techniques and Save Money!

Rarely is someone allergic to just one substance. It is usually a number of allergens that has caused your immune system to become weakened to the point that you have symptoms. A person with mild to moderate amount of allergies may take about 15-30 office visits to desensitize 15-30 food and environmental allergens. **By learning the techniques used with NAET**, you can reduce the number of in-office visits saving you time and money!

### Experience the Freedom from Allergies Today!

Call for your initial consultation today. The first appointment will include a medical history, explanation of NAET and a treatment. Feel better TODAY!
